Subject: status of applicability of SACA grant to upriver source control activities
Date: Tuesday, April 4, 2017 11:35:13 AM

Davis, just wondering if you've had any clarification come from HQ on this matter, or a timeline for resolution. As stated on Friday, the SACA grant is DEQ's sole current source of funding for the collaboration with EPA on this ROD required activity. In addition to past costs from the last couple of months, we have substantial planning effort underway to prepare for the May meeting with stakeholders and expect a related increase in hours to do this.

DEQ does acknowledge and appreciates the \$100k provided to assist in site discovery.

Thanks

Keith Johnson
